This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

METALLURGICAL BIBLIOGRAPHY,

1901—06.

o o o

THE following list I believe to be nearly a complete catalogue of the books relating to metallurgy published during the 20th century. The English, American, French and German titles, having been obtained with comparative ease, will probably be found more inclusive than the Spanish, Italian, and, above all, the Russian. One or two only of the latter have been included, and these from German sources.

R. A. PEDDIE.

St. Bride Foundation,
Bride Lane, E.C.

General Works.

Hiorns, Arthur H. Principles of metallurgy. 2nd ed. 14 + 388 pp. 144 *Illus.* London: Macmillan & Co., 1901.

Schnabel, Carl. Handbuch der Metallhüttenkunde. 2te. Aufl. 2 vol. Berlin: Julius Springer, 1901-04, 50 m.

Ditte, Alfred. Introduction à l'étude des métaux. 2 + 492 pp. *Illus* Paris: Société l'éditions scientifiques, 1902, 15 fr.

Gower, Alfred Roland. Practical metallurgy: an elementary text book. New ed. 12 + 116 pp. 32 *Illus.* London: Chapman & Hall, 1902, 1s.

Le Verrier, U. Métallurgie générale. Procédés de chauffage. 371 pp. 171 *Illus.* Paris: Gauthier-Villars, 1902, 10 m.

Perret, Auguste. Zinc, étain, nickel, cobalt. 160 pp. *Illus.* Paris: Bernard & Cie., 1902, 1 fr. 50.

Perrett, Auguste Or, argent, platine. 160 pp. *Illus.* Paris: Bernard & Cie., 1902, 1 fr. 50.

——— Cuivre, plomb, mercure. 160 pp. *Illus.* Paris: Bernard & Cie., 1902, 1 fr. 50.

Roberts-Austen, *Sir* **W. C.** An Introduction to the study of metallurgy. 5th ed. 16 + 516 pp. *Illus.* London: C. Griffin & Co., 1902, 18s.

Borchers, Wilhelm. Das neue Institut für Metallhüttenwesen und Elektrometallurgie an der k. technischen Hochschule zu Aachen. Halle: 1903, 6 m.

Richard 11-a-4 F.C

Cremer, J. H. Chemical and metallurgical handbook. 3rd ed. London: Paul, 1903, 18 m. 50.

Hubert, E. d'. Les minéraux, les métaux, les alliages. 96 pp. 27 *Illus.* Paris: J. B. Bailliere et fils, 1903, 1 fr. 50.

Ledebur, A. Traité de technologie mécanique métallurgique. Trad. sur la 2e édition allemande par G. Humbert. 6+750 pp. *Illus.* Paris: Gauthier-Villars, 1903, 25 fr.

Ohly, J. Analysis, detection, and commercial value of the rare metals (including their occurrence, distribution and statistics). Denver, Col.: Indust. Printing and Pub. Co., 1903, $3.

Pécheux, H. Précis de métallurgie. 8+448 pp. 133 *Illus.* Paris: J. B. Baillière et fils, 1903.

Schnabel, Carl. Lehrbuch der allgemeinen Hüttenkunde. 2te. Aufl. 16+757. 718 *Illus.* Berlin: J. Springer, 1903, 16 m.

Sexton, A. Humboldt. An elementary text-book of metallurgy. 3rd ed. 280 pp. *Illus.* London: C. Griffin & Co., 1903, 6s.

Smith, Albert W. Materials of machines. 142 pp. *Illus.* New York: J. Wiley & Sons, 1903, $1.

Babu, L. Traité théorique et pratique de métallurgie générale. Vol. 1, 7+593 pp., 148 *Illus.* Vol. 2, 705 pp., *Illus.* Paris: Libr. Polytech. C. Béranger. 1904, 25 fr.; 1906, 25 fr.

Fischer, Th. Leitfaden der Metallurgie. 12+438 pp. 29 *Illus.* Leipzig: J. J. Weber, 1904, 5 m.

Hubert, E. d'. Les métaux précieux (mercure, argent, or, platine). 96 pp. 34 *Illus.* Paris: J. B. Bailliere et fils, 1904, 1 fr. 50.

——— Les métaux usuels (cuivre, zinc, étain, plomb, nickel, aluminium). 96 pp. 26 *Illus.* Paris: J. B. Bailliere et fils, 1904, 1 fr. 50.

Levat, David. Mines et métallurgie. 26e édition. 10+276 pp. 64 *Illus.* Paris: Vve. Dunod, 1904, 2 fr. 50.

Neumann, Bernhard. Die Metalle, Geschichte, Vorkommen und Gewinnung. 8+421 pp. *Tables.* Halle: W. Knapp, 1904, 16 m.

Schnabel, Carl. Traité de métallurgie générale. Trad. d'après la 2e éd. allemande par L. Gautier. 2+759 pp. 768 *Illus.* Paris: 1904, 30 m.

Zinone, A. Metalli preziosi. 11 + 315 pp. Milano: U. Hoepli, 1904, 3 lire.

Dahlerns, C. C. Exposé de l'industrie minière et métallurgique de la Suède. 157 pp. 2 *Maps.* Stockholm: 1905, 4 m.

Ledebur, A. Lehrbuch der mechanisch-metallurgischen Technologie. 3te. Aufl. 16 + 805 pp. 754 *Illus.* Braunschweig: F. Vieweg & Sohn, 1905, 24 m.

Le Verrier, U. Procédés métallurgiques et études des métaux. 403 pp. *Illus.* Paris: Gauthier-Villars, 1905, $3.60.

Schnabel, Carl. Handbook of metallurgy. Trans. by Henry Louis. 2nd ed. 2 vols. London: Macmillan & Co., 1905-07, 50s. net.

Hildebrandt, H. Lehrbuch der Metallhüttenkunde. 16 + 531 pp. 333 *Illus.* Hannover: M. Jänecke, 1906, 14 m.

Ingalls, Walter Renton. Notes on metallurgical mill construction. 256 pp. New York: Engin. & Min. Jour., 1906, $1.50.

Miller, G. W. Elements of mining geology and metallurgy. 489 pp. *Illus.* Denver, Col.: Daily Mining Record [1906], $3.50.

Richards, Joseph W. Metallurgical calculations. Part 1. 208 pp. New York: McGraw Pub. Co., 1906, $2.

Electro-Metallurgy.

Minet, Adolphe. Traité théorique et pratique d'electro-métallurgie. 6 + 599 pp. *Illus.* Paris: Béranger, 1901.

Borchers, Wilhelm. Elektro-metallurgie. Die Gewinnung der Metalle unter Vermiltling der elektrischen Stromes. 3te. Aufl. 8 + 4 + 584 pp. 255 *Illus.* Leipzig: S. Hirzel, 1902-3, 20 m.

Watt, Alexander, and **Philip, A.** Electro-plating and electro-refining. 24 + 680 pp. 160 *Illus.* London: Crosby, Lockwood & Co., 1902, 12s. 6d.

Borchers, Wilhelm. Elektro-metallurgie des Nickels. 35 pp. 4 *Illus.* Halle: W. Knapp, 1903, 1 m. 50.

Guillet, Léon. Précis d'électrochimie et d'électrométallurgie. 357 pp. 78 *Illus.* Paris: J. B. Bailliere et fils, 1903.

Günther, Emil. Verfahren zur Gewinnung von Kupfer und Nickel aus Kupfer-und Nickel-haltigen Magnetkiesen [auf elektrolytischem Wege.] 32 pp. Berlin: [Craz & Gerlach: Freiberg,] 1903, 2 m. 50.

Ponthière, H. Traité d'Electrométallurgie. 3e édition. Paris, 1903, 12 m. 50.

Borchers, Wilhelm. Electric smelting and refining. 2nd Eng. ed. from the 3rd Germ. ed. 562 pp. 254 *Illus.* London: C. Griffin & Co., 1904, 21s.

Matignon, C. Electrométallurgie des Fontes, Fers et Aciers. 96 pp. 37 *Illus.* Paris, 1906, 4 m.

Alloys.

Buchanan, John F. Brassfounder's alloys. 8 + 130 pp. 12 *Illus.* London: E. and F. N. Spon, 1901, 4s. 6d.

Hiorns, Arthur W. Mixed metals, or metallic alloys. 2nd ed. London, 1901.

Société d'Encouragement pour l'Industrie Nationale.—Commission des Alliages. Contribution à l'étude des alliages. Paris: 1901.

Müller, L. Die Bronzewaren-Fabrikation. 2te. Aufl. Wien, 1902.

Gages, L. Les alliages métalliques. 164 pp. Paris: Gauthier-Villars. 1903.

Howe, Henry M. Iron, steel, and other alloys. 457 pp. Boston: Sauveur & Whiting, 1903, $5.

Stoffel, A. Onderzoek over binaire en ternaire alliages van tin, bismuth, cadmium en load. 8 + 74 pp. 2 *Tab.* Amsterdam: 1903, 3 m.

Thurston, Robert H. A treatise on brasses, bronzes, and other alloys, and their constituent metals. (Part III. *of his* Materials of Engineering.) 4th ed. 16 + 574 + 18 pp. 43 *Illus.* New York: J. Wiley & Sons, 1903, $2.50.

Guillet, Léon. Étude théorique des alliages métalliques. 7 + 233 pp. 118 *Illus.* Paris: Vve. Ch. Dunod, 1904, 7.50 fr.

Mortillet, Léon de. Les amalgames et leurs applications. 50 pp. Paris: B. Tignol, [1904].

Tassily, E. Études sur les propriétés physiques des alliages métalliques. Paris: 1904, 5 m.

Buchetti, J. Les alliages métalliques actuels et leur métallographie. Paris, 1905, 12m. 50.

Guillet, Léon. Étude industrielle des Alliages métalliques. 2 vol. 1178 pp. 100 *Plates.* Paris, 1906.

Metallography.

Hiorns, Arthur W. Metallography: an introduction to the study of the structure of metals, chiefly by the aid of the microscope. 14 + 158 pp. 96 *Illus.* London: Macmillan & Co., 1902, 6s.

Heyn, E. Die Metallographie in Dienste der Hüttenkunde. 43 pp. 26 *Illus.* Freiberg: Craz & Gerlach, 1903, 1 m.

Hiorns, Arthur H. Métallographie. Introduction à l'étude de la structure des métaux, principalement à l'aide du microscope. Trad. par E. Bazin. Paris: Béranger, 1903.

Osmond, Floris. Microscopic analysis of metals. Edited by J. E. Stead. 7 + 178 pp. 91 *Illus.* London: C. Griffin & Co., 1904, 7s. 6d.

Mellor, J. W. The crystallization of iron and steel. An introduction to the study of metallography. 10 + 124 pp. 65 *Illus.* London: Longmans, Green & Co., 1905, 5s.

Assaying and Analysis.

Church, Seymour R. Analysis of pig iron. 2 vol. San Francisco: Hicks, Judd Co. [1900-02], $10.

Brearley, Harry, and **Ibbotson, Fred.** The analysis of steel-works material. 15 + 501 pp. 85 *Illus.* London: Longmans, Green & Co., 1902, 14s.

Fletcher, E. L. Practical instructions in quantitative assaying with the blowpipe. 1st ed., 2nd 1,000. 6 + 142 pp. *Illus.* New York: J. Wiley & Sons, 1902.

Howe, Henry M. Metallurgical laboratory notes. 14 + 140 pp. 44 *Illus.* Boston: The Boston Testing Laboratories, 1902.

Morgan, J. James. Aids to the analysis of ores, metals, fuels, etc. 8 + 105 pp. London: Bailliere, Tindall & Cox, 1902, 2s. 6d.

Rhead, E. L., and **Sexton, A. Humboldt.** Assaying and metallurgical analysis for the use of students, chemists and assayers. 10 + 431 pp. 105 *Illus.* London: Longmans, Green & Co., 1902, 10s. 6d.

Ricketts, Pierre de Peyster, and **Miller, Edmund H.** Notes on assaying. 3rd ed. 8 + 312 pp. 39 *Illus.* New York: J. Wiley & Sons, 1902.

Cremer, J. H., and **Bicknell, G. A.** Chemical and metallurgical handbook. 406 pp. Cleveland, O.: Cremer & Bicknell, 1903, $3.50.

Furman, H. v. F. A manual of practical assaying. 5th ed. 8 + 464 pp. *Illus.* New York: J. Wiley & Sons, 1903.

Lord, Nathaniel Wright. Notes on metallurgical analysis. 2nd ed. 228 pp. Columbus, Ohio: Hann & Adair, Metallurgical Lab., 1903, $2.50.

Macleod, William A., and **Walker, Charles.** Metallurgical analysis and assaying. 12 + 318 pp. 109 *Illus.* London: C. Griffin & Co., 1903, 12s. 6d.

Martin, F. W. Laboratory guide to quantitative analysis with the blowpipe. 45 pp. *Illus.* New York: 1903, 2 m. 8o.

Stansbie, J. H. Introduction to metallurgical chemistry. 200 pp. 46 *Illus.* Bristol: J. Wright & Co., 1903, 4s. 6d.

Clennell, J. E. The chemistry of cyanide solutions resulting from the treatment of ores. 4 + 164 pp. New York: Engineering and Mining Journal, 1904, $2.50.

Crobaugh, F. L. Methods of chemical analysis and foundry chemistry. 2nd ed. 109 pp. Cleveland, O.: F. L. Crobaugh, 1904, $2.
